### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record, which is the most pertinent art found, fails to teach and/or fairly suggest the instant invention. The abstracts of the three Japanese publications used in the rejection (JP 2002-275387, JP 05-2222328, and JP 2002-309118) fail to teach and/or fairly suggest the specific arrangement of pigment, linking group, and hydrophilic compound as defined in amended Claim 1. As for Endo et al (U.S. patent no. 5,635,522) while the reference describes linking an organic dye to a heterocyclic ring which could be a hydrophilic group it fails to teach and/or fairly suggest the hydrophobic pigments now recited in amended claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
